SUMMARY

Enthusiastic and motivated Computer Science undergraduate with strong foundational knowledge in Java, Object-Oriented Programming (OOP), and backend development principles. Familiar with Spring Boot framework for building RESTful APIs and working with relational databases such as MySQL. Passionate about learning modern software engineering practices, writing clean and maintainable code, and contributing effectively to team-based development environments. Eager to gain hands-on experience in backend development and grow as a professional Java/Spring Boot developer.

Aspiring Java / Spring Boot Intern with strong knowledge in Java, OOP, REST APIs, and backend development.

PROFESSIONAL EXPERIENCE

Trainning Backend developer -Portion (Private) Limited.

March 2024

Portion (Private) Limited

- Designed, developed, and maintained dynamic web applications using PHP, MySQL, HTML, CSS, and JavaScript.
- Built clean, scalable, and secure backend systems following best coding practices and software engineering principles.
- Developed and integrated RESTful APIs to enable efficient data communication between frontend and backend systems.
- Optimized database queries in MySQL to improve application performance, speed, and reliability.
- Troubleshoot, debugged, and resolved application issues to ensure smooth system functionality and minimal downtime.
- Actively participated in the full Software Development Life Cycle (SDLC), including requirement analysis, design, development, testing, and deployment.
- Ensured high standards of performance, quality, security, and responsiveness across all web applications developed and maintained.

PROJECT EXPREANCE

Ecommerce- Multivendor

December 2025

- Designed and implemented a secure OTP-based authentication system using Spring Boot and Spring Security for multi-user login flow.
- Developed and tested 5+ RESTful APIs for OTP generation, validation, and authentication.
- Improved API reliability by implementing custom exception handling, reducing error inconsistencies by ~30%.
- Integrated Spring Boot Starter Mail for OTP email delivery with real-time notification support.
- Used MySQL for secure data storage and optimized query performance by ~20%.
- Enhanced application security and user experience through proper validation and error handling.
- Followed clean code and backend best practices to build a scalable and maintainable API architecture.

- Developed a full-stack web application using Spring Boot for backend services and React for frontend development.
- Implemented state management using Redux to ensure efficient and scalable data flow across the application.
- Designed responsive and user-friendly UI components using Material UI (MUI) and Tailwind CSS.
- Integrated Stripe payment gateway for secure and reliable online payment processing.
- Used Axios for seamless API communication between frontend and backend systems.
- Focused on building a modular and maintainable architecture through proper integration of modern development tools and libraries.
- Improved development efficiency by applying incremental updates and iterative integration of system components.

Exam Management System in University (Group Project)

2023

- The project was developed using the Spring Boot and React tech stack. To make it robust, responsive, and user-friendly, I utilized modern tools and libraries such as Redux, MUI, Tailwind CSS, Stripe, and Axios.
- During the development process, I learned that making small incremental updates and properly integrating tools can have a big positive impact on the final product

EDUCATION

Sep 2020 - Feb 2025

Bachelor of Information and Communication Technology (Honours)

University of Jaffna

GCE Advanced level - Engineering Technology

UP/ Devananda Central college - Welimada

August 2017

SKILLS

- Service Layer(Java, PHP, C, C++, C#)
 - Database(MySQL)
 - Web Stack(HTML5,CSS,JavaScrip,spring boot)
 - UX/UI(Adobe XD)
 - Software Tool(Visual Studio, VM ware, Auto Cade, VS code, Tally Prime, Proteus, Babun, GitHub, GitHub Desktop)
- Problem solving
 - Teamwork & collaboration
 - Work ethic
 - Critical thinking
 - Time management
