SUMMARY

I am a passionate and motivated Software Developer with a strong interest in Java and backend development. I have hands-on knowledge of Java, Object-Oriented Programming (OOP), Spring Boot, Spring Framework, RESTful API development, JSON communication, and MySQL databases. I am also familiar with PostgreSQL and have experience using Git and GitHub for version control.

I have exposure to Maven build tools and enjoy building scalable web applications using modern development practices. I am committed to writing clean, organized, and maintainable code while continuously learning new technologies.

I enjoy solving real-world problems, working on projects, and improving my technical skills. My goal is to grow as a professional Full-Stack Developer and gain more experience in software development.

PROFESSIONAL EXPERIENCE

Training Backend developer -Portion (Private) Limited.

March 2024

Portion (Private) Limited

- Developed and maintained web applications using PHP, MySQL, HTML, CSS, and JavaScript.
- Built secure and scalable backend systems using best coding practices.
- Created and integrated REST APIs for smooth communication between frontend and backend.
- Improved database performance by optimizing MySQL queries.
- Fixed bugs and resolved issues to keep applications running smoothly.
- Worked in all stages of software development including planning, design, development, testing, and deployment.
- Focused on building fast, reliable, and user-friendly web applications.

PROJECT EXPERIENCE

Portfolio Project

2026

- Designed and developed a personal portfolio website using React and Tailwind CSS to showcase projects and skills.
- Built a responsive and user-friendly UI with modern design principles for better user experience across all devices.
- Ensured full mobile responsiveness for smooth and consistent performance on smartphones, tablets, and desktops.
- Organized project content, skills, and contact sections to present a professional developer profile effectively.

Ecommerce- Multivendor

December 2025

- Built a secure OTP-based authentication system using Spring Boot, Spring Security, and JWT for user login.
- Developed and tested REST APIs for OTP generation, validation, and authentication.
- Designed and integrated email service for OTP delivery using Spring Boot Mail.
- Built frontend features using React with Redux and Formik for state and form handling, following MVC architecture.
- Used MySQL for data storage and optimized database queries, improving performance by approximately 20%.
- Improved application security, error handling, and user experience while following clean code practices.

Restaurant Management System Project

August 2024

- Developed a full-stack web application using Spring Boot for backend services and React for frontend development.
- Implemented state management using Redux to ensure efficient and scalable data flow across the application.
- Designed responsive and user-friendly UI components using Stripe, Material UI (MUI), and Tailwind CSS.
- Integrated Stripe payment gateway for secure and reliable online payment processing.
- Used Axios for seamless API communication between frontend and backend systems.
- Focused on building a modular and maintainable architecture through proper integration of modern development tools and libraries.
- Improved development efficiency by applying incremental updates and iterative integration of system components.

Exam Management System in University (Group Project)

2023

- The project was developed using the Spring Boot and React tech stack. To make it robust, responsive, and user-friendly, I utilized modern tools and libraries such as Redux, MUI, Tailwind CSS, and Axios.
- During the development process, I learned that making small incremental updates and properly integrating tools can have a big positive impact on the final product

EDUCATION

Sep 2020 - Feb 2025

Bachelor of Information and Communication Technology (Honours)

University of Jaffna

GCE Advanced level - Engineering Technology

UP/ Devananda Central college - Welimada

August 2017

SKILLS

- | | |
|--|----------------------------|
| • Service Layer(Java, PHP, C, C++, C#) | • Problem solving |
| • Database(MySQL) | • Teamwork & collaboration |
| • Web Stack(HTML5,CSS,JavaScrip,spring boot framework) | • Work ethic |
| • UX/UI(Adobe XD) | • Critical thinking |
| • Software Tool(Visual Studio, VM ware, Auto Cade, VS code, Tally Prime, Proteus, Babun, GitHub, GitHub Desktop) | • Time management |
| | • Responsibilities |
| | • support and assist |
| | • logical thinking |

I hereby declare that all the information provided above is true and accurate to the best of my knowledge and belief.
